HYDROPLUS WHITE – WATERBORNE CONVERTER/TOPCOAT FOR INTERIORS

ATV99XX/BB

ATV99 is a new-generation waterborne white system developed to deliver **excellent aesthetic quality and reliable performance** for interior applications.

Designed to integrate smoothly with modern tinting technologies, it provides **consistent results, process efficiency, and flexibility in colour creation**.

With its upgraded formulation, ATV99 ensures **high-quality finishing combined with enhanced resistance properties**, supporting demanding interior environments.

TINTING SYSTEM COMPATIBILITY

ATV99 is designed to work seamlessly with current tinting systems, offering:

- Full integration with Sayerlack tinting system **Wood Colour Plus**
- Compatibility with updated colour platforms
- Availability of optimised formulations for standard colours

PRODUCT RANGE	
ATV9915/BB	White converter, 15 gloss
ATV9930/BB	White converter, 30 gloss
ATV9950/BB	White converter, 50 gloss

HYDROPLUS WHITE – WATERBORNE CONVERTER/TOPCOAT FOR INTERIORS

ATV99XX/BB

PERFORMANCE

ATV99 has been extensively tested according to the main recognised standards, including:

- EN 12720 – resistance to cold liquids
- UNI 11216 – vertical surface applications

The system offers **excellent overall resistance and durability**, including:

- Strong resistance to household chemicals
- Good thermal stability and surface hardness

Enhanced resistance properties:

- Alcohol resistance (low and high concentration)
- Resistance to alkaline substances (e.g. ammonia)
- Improved resistance to staining agents (e.g. coffee)

These characteristics ensure **robust performance in real-use environments**, especially where cleaning agents are frequently used.

KEY FEATURES	Brighter white appearance
	Reduced tinting paste consumption
	Easy application
	Wide compatibility with tinting systems
	Enhanced overall performance

TECHNICAL APPLICATION	
SEGMENT OF USE	Furniture / Interior building products
APPLICATION	Colours on demand
