FOR ALL INTERIOR  
FURNISHINGS

ENHANCES THE NATURAL  
BEAUTY OF WOOD

EXCEPTIONALLY RESISTANT  
TO STAINS, SCRATCHES,  
WRITING AND YELLOWING

 **SAYERLACK**<sup>®</sup>  
INNOVATIVE WOOD SOLUTIONS

Sayerlack is a brand of  
The Sherwin-Williams Company

From the Sherwin-Williams Italy R&D laboratories comes an innovative solution for enhancing and preserving the unique natural beauty of wood.

**AF0618/00** is a new waterborne two component self-sealer offering an advanced level of physical and chemical performance. Exceptionally resistant to writing, scratching, staining, detergents and yellowing from light exposure, the product can be used on all interior furnishings: not just doors, bedrooms or living rooms, but kitchen and bathrooms too.

### EXCEPTIONAL PERFORMANCE

What makes this product so special is that it achieves these spectacular results on light colored timbers with a near zero gloss finish, even if these surfaces aren't easy to protect from stains like wine, coffee and ammonia. At the same time, it maintains optimal transparency on dark woods.

Its isolation of high tannin wood is outstanding, as it doesn't require an isolating basecoat. Exceptional results have been achieved on reconstituted veneers with no changes in color tone thanks to optimum light protection. If a specific hardener is used the product is also suitable for thermo treated timbers, which are becoming increasingly popular.

### A SOLUTION FOR ALL KINDS OF HARDENER

- **AH 1564/00** for light woods and reconstituted veneers
- **AH 1550/00** for reviving natural wood
- **AH 1503/00** for enhancing transparency on dark woods.

### CERTIFIED RESULTS

When tested by **CATAS** certificate institute labs, the performance levels on a two coats system on beech wood achieved **R4 IKEA (IOS MAT-0066)** standard ratings, as well as a **CEN/TS 16209 class B category** in **EN 12720:2013** surface resistance to cold liquids tests.
