ACRYLIC HIGH GLOSS SELF HEALING TOPCOAT TLV3778/00

TLV3778/00 is an acrylic high gloss topcoat with high build, glossy, and performing like a standard acrylic paint, but with the ability of self heal most part of the damages due to mechanical stress.

NOTE: similarly to any other high gloss acrylic topcoat, the preparation of the substrate is a critical point for the final result in terms of appearance. It is therefore recommended to carefully sand the polyester basecoat prior the application. The film can self heal most part of scratches caused by pressure and is not effective against cuts.
